## **Loscam's 'bag in a box' system brings the latest technology to liquid logistics**

Today Loscam, Asia Pacific's leader in returnable packaging solutions, announced the release of IBC I8, its new Intermediate Bulk Container designed for the transportation of liquids.

The IBC I8 is made from polypropylene and features a hygienic 'bag in a box' system which makes it easy for food and manufacturing companies to fill, transport and discharge product.

"We were aware that we needed to extend our product offering to cater for specific customer requirements, so we took the initiative to invest in the IBC I8," said Loscam Senior Business Development Manager, Naz Miljanic.

"The IBC I8 allows for the safe transportation of acidic-based liquids such as fruit juices and vinegars. Customers in the food and manufacturing industries can be certain their products will remain in perfect condition from pick-up to delivery, without the risk of damaging the containers which they are transported in," she added.

Loscam's heavier duty IBC I6 already caters for more robust and non-acidic applications including dairy, oils, and liquid sugar.

nudie, one of Australia's leading beverage companies is using the IBC I8 to transport its fruit juices across the country.

"Loscam has always understood what we require to help make our job easier, and reacts quickly to support us to meet the needs of our growing customer base," said nudie General Manager Operations and Finance, Warren Douglas.

"As we work in a very fast moving environment, we're always looking for opportunities to optimise our supply chain process. The IBC I8 is easy to deliver, empty and return, and importantly it upholds our stringent food safety standards," Mr Douglas added.

Daniel Bunnett, Loscam executive vice president for Australia and New Zealand said the release of Loscam's new lighter weight IBC I8 gives customers greater choice when choosing an IBC to suit their needs and further enhances the company's service offering to food and manufacturing customers.

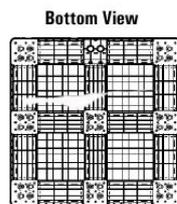

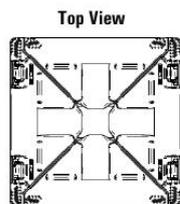

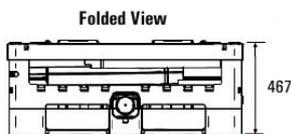

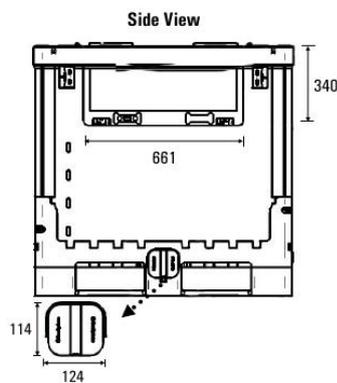

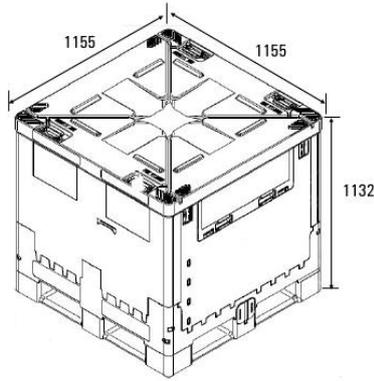

"The IBC I8 is yet another example of Loscam delivering solutions for customers which bring benefits to the supply chain process," he said.

Ends.

## Loscam IBC I8 Fact Sheet

The Loscam Foldable Plastic Liquid Intermediate Bulk Container (IBC) - I8 is developed specially for the food industry such as fruit juice, dairy, vegetable oil etc. The lightweight and foldable container features a hygienic efficient "bag in box" system which is easy to fill, discharge and transport. The half folding front "drop gate" enables ease of access and the sight glass provides clear view of the product. I8 is extremely cost-effective due to its 2.5 to 1 return ratio.

<b>Product</b>	IBC I8
<b>Dimensions</b>	External: 1155mmL x 1155mmW x 1132mmH Internal: 1065mmL x 1045mmW x 940mmH
<b>Tare Weight</b>	90 kg
<b>Capacity</b>	1060 litre
<b>Loading Capacity</b>	1400 kg
<b>Stacking Capacity</b>	Static: 5 high when loaded, 10 high when folded Dynamic: 2 high when loaded
<b>Material</b>	Food-grade Polypropylene
<b>Forklift Access</b>	4 way entry
<b>Uses</b>	Suitable for food industry including fruit juices, dairy, fats, oils, honey & syrups, mayonnaise, wine/vinegar and pharmacy products

### Benefits

- Easy to fill, discharge and transport
- Half folding front "drop gate" allows ease of access
- Sight glass provides clear view of product level
- Tamper evident and lockable lid assures product safety
- Suitable for use with Loscam plug-in heater baseboard which improves viscous liquid discharge
- Freezer compatible and UV resistant
- 2.5:1 folding ratio saves cost in transport and storage
